PRECAUTIONARY BOIL WATER NOTICE

PWS # 1230545

Revision

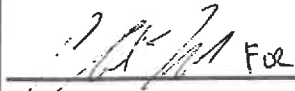

DATE: 10/14/2026

TO: Customers at: 1916, 1912, 1910, 1908, 1906, 1904, 1902, 1900 Forest Park Ave.

Due to a water main break that supplies your drinking water, there is a concern for possible contamination. Therefore, as a precaution, we advise that all water used for drinking or cooking be boiled. A rolling boil of one minute is sufficient. As an alternative bottled water may be used for these purposes.

When the main has been repaired and flushed, bacteriological samples of the water will be collected and sent to the laboratory. This *precautionary boil water notice* will remain in effect until the bacteriological samples show the water is safe to drink. On average, this will take about 3 days.

If you have any questions you may contact Larry McClamma at the Water Department Office at 850-247-0822 or John Grantland at the City of Port St. Joe Public Works Office at 850-229-8247.
